

Deep-Dive Analysis & Interactive Dashboarding

Internship Task 3
By Karri Jyothi Archini

1.Objective :

The objective of this project is to perform a deep-dive analysis on the Superstore dataset and develop an interactive dashboard that enables users to monitor key business metrics and gain actionable insights.

2.Dataset Description :

The Superstore dataset contains sales transactions from a retail business and includes information about:

- Orders
- Customers
- Products
- Sales
- Profit
- Regions
- Categories
- Shipping Modes

The dataset was cleaned and analyzed before creating the dashboard.

3.Key Performance Indicators (KPIs) :

3.1. Total Sales

Formula: SUM(Sales)

Purpose: Measures overall business revenue.

Result: 2.30 Million

3.2. Total Profit

Formula: SUM(Profit)

Purpose: Measures business profitability.

Result: 286.40 Thousand

3.3. Total Orders

Formula: DISTINCTCOUNT(Order ID)

Purpose: Measures total transactions.

Result: 5000

3.4. Average Order Value (AOV)

Formula: Total Sales / Total Orders

Purpose: Measures average spending per order.

Result: 458.61

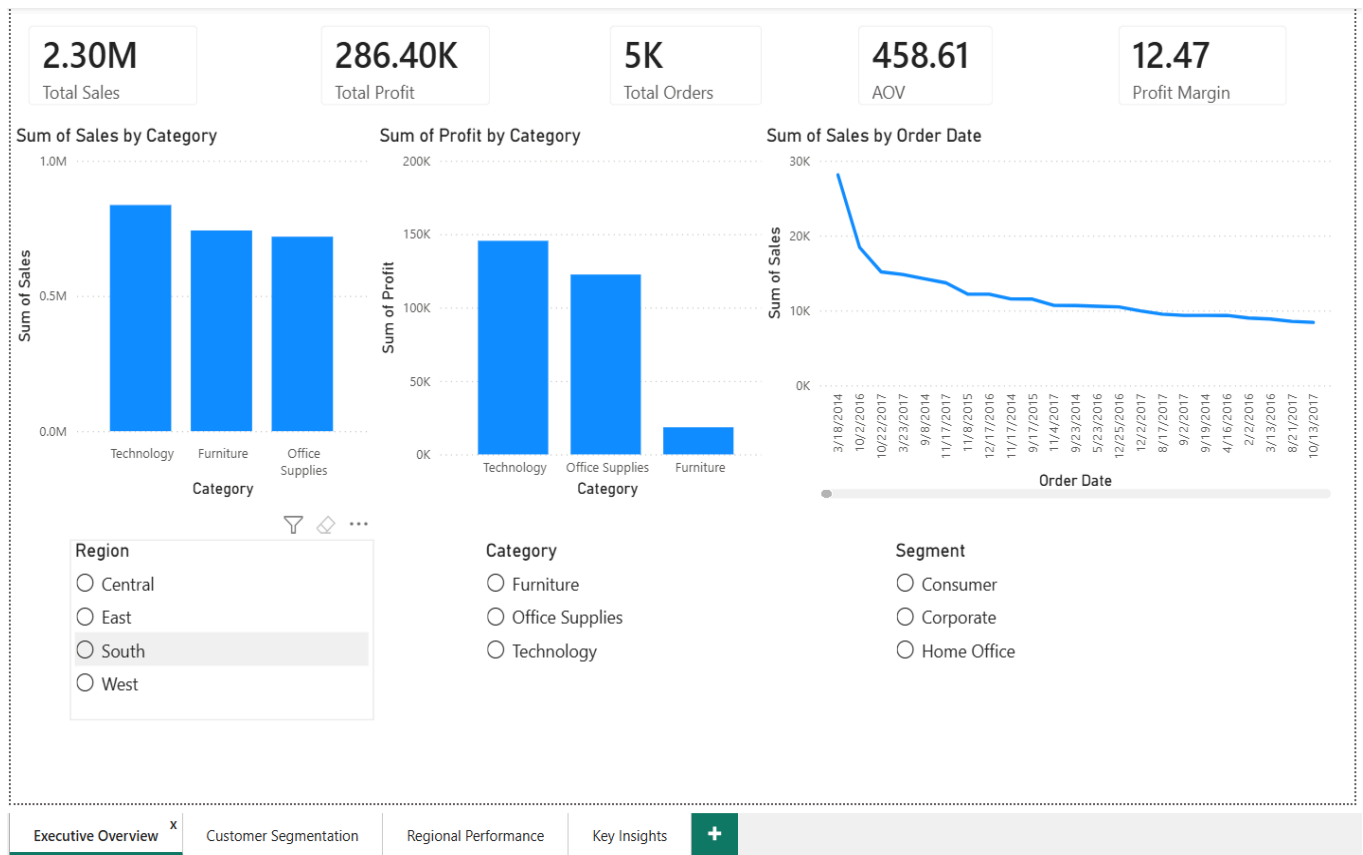

3.5. Profit Margin

Formula: (Total Profit / Total Sales) * 100

Purpose: Measures profitability efficiency.

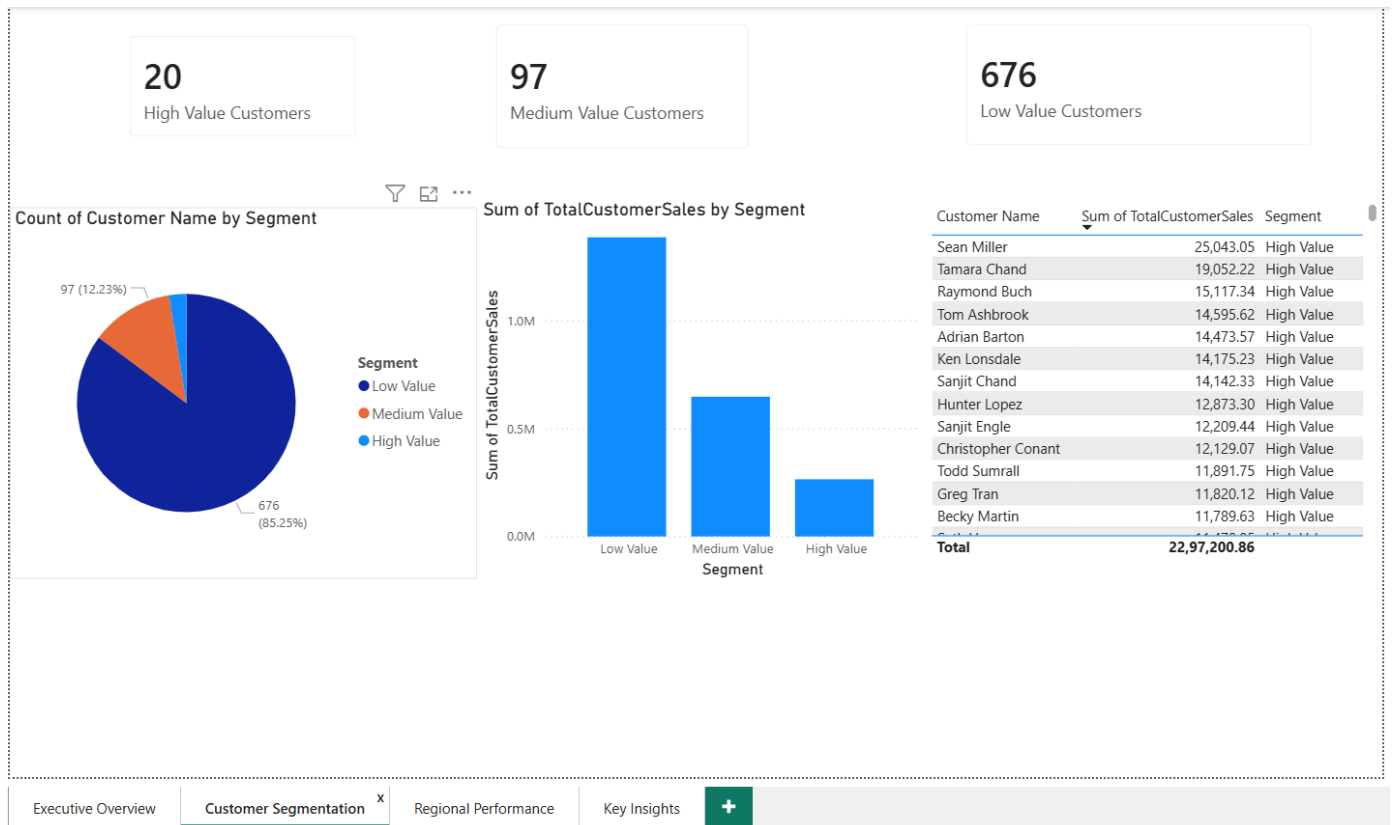

Result: 12.47%

4.Executive Overview Dashboard :

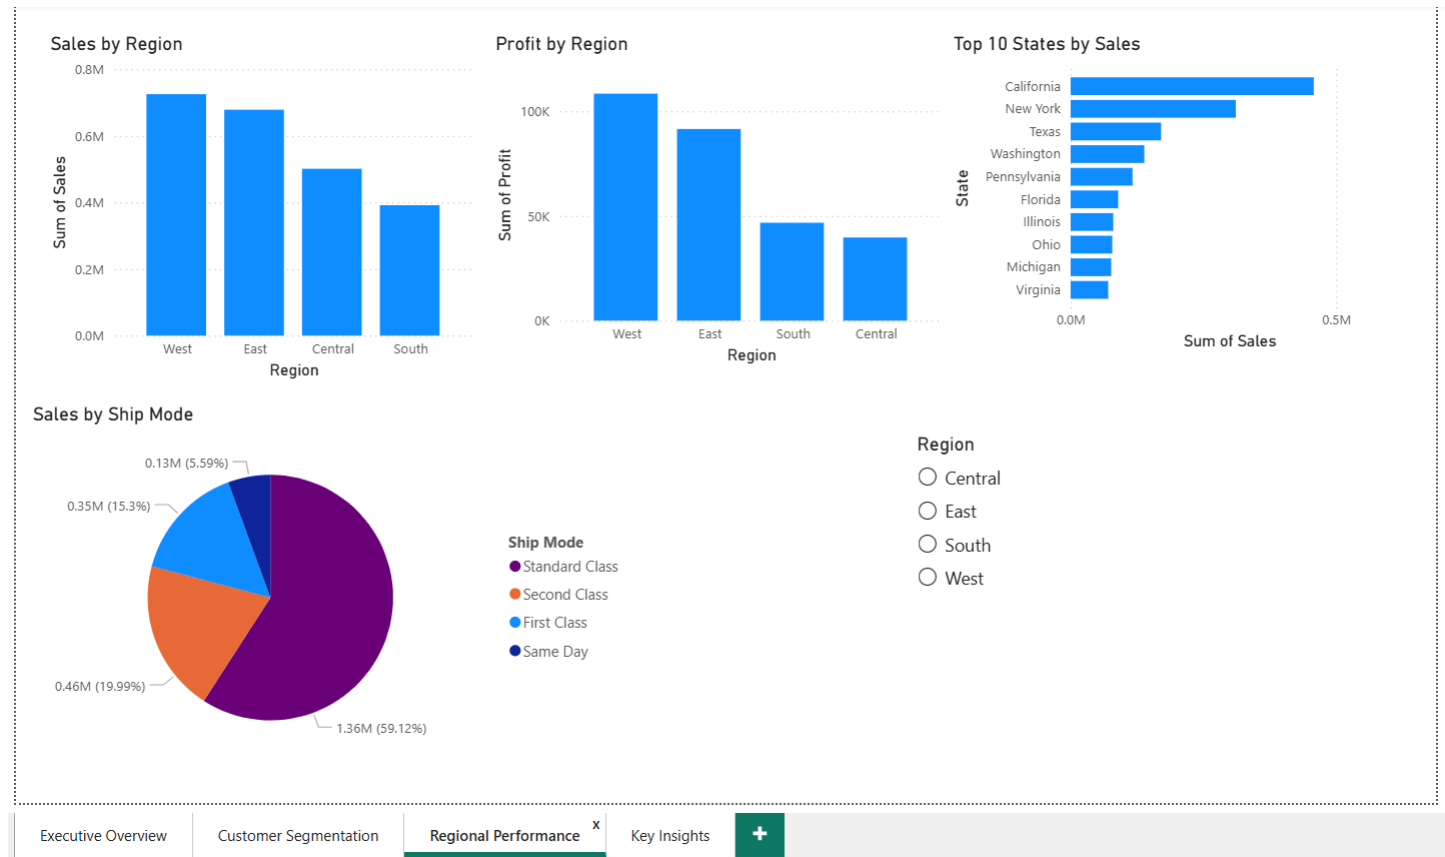

- Total Sales reached 2.30M.
- Technology category generated the highest sales.
- Technology category generated the highest profit.
- Profit Margin is 12.47%.

5. Customer Segmentation Analysis :

- Low-value customers account for the majority of customers.
- High-value customers are few but contribute significantly to revenue.
- Top customers generate a large portion of total sales.

6.Regional Performance Analysis :

- West region has the highest sales and profit.
- California is the top-performing state.
- Standard Class shipping contributes the highest sales.

7.Key Findings :

Executive Overview • Total Sales exceeded 2.30M • Technology generated the highest sales. • Technology generated the highest profit. Customer Segmentation • High-value customers contribute most revenue. • A small percentage of customers drive a large share of sales. Regional Performance • West region generated the highest sales. • Some regions have strong sales but lower profitability.
Executive Overview Customer Segmentation Regional Performance Key Insights x +

- Technology is the best-performing category.
- West region drives business growth.
- High-value customers are crucial for revenue.
- Standard Class is the dominant shipping mode.

8.Conclusion :

The dashboard successfully provides an interactive platform for monitoring sales performance, customer behavior, and regional trends. The analysis reveals that Technology products, West region sales, and high-value customers are major contributors to business success.
